

ChainPol

The Geopolitics of Blockchain

Geopolitical and Regulatory Intelligence Platform for Crypto-Assets.

Powered by your company

A Strategic Decision-Support Vision

ChainPol sits at the heart of decentralized finance, state sovereignty and energy markets.

Who uses ChainPol?

- Investment Funds & Venture Capital (VC): to guide startup domiciliation choices.
- Bitcoin Miners: to target countries combining a green energy mix and legislative stability.
- Compliance Officers: to anticipate MiCA, Travel Rule and FATF regulations.
- Any decision-maker and investor

Real-Time Geopolitical Visualization

- Interactive world map with dynamic color coding (Favorable, Neutral, Hostile).
- Stackable thematic layers: Regulation, Taxation, Adoption, PoW Mining and Overall Risk.
- Supranational banner: summarized tracking of EU, OECD, IMF, G20 and BRICS positions.

The Regulation Center (Country Profile)

- Regulatory Timeline: exhaustive list of enacted laws and official implementing decrees by country.
- Risk Radar: 5 axes analyzed (Regulatory, Tax, Operational, Geopolitical, Reputational).
- Scientific Review: aggregation of academic publications worldwide to support location decisions.

Artificial Intelligence & Predictive Models

- Regulatory predictive model: flow analysis to anticipate legislative trends 6-12 months ahead.
- AI Confidence Index: accuracy rate calculated for each regulatory outlook.
- Chat with the Law: query the AI to simplify the understanding of local legal codes.

Mining Intelligence: Industrial Optimization

- PoW Indicators: network difficulty, global hashrate and live BTC price.
- ROI Calculator: integrates hardware specifications (TH/s, Watts) and local kWh costs.
- National energy mix: analysis of the fossil vs. renewable energy ratio for each country.

Benchmarking & Multi-Zone Comparison

- Side-by-Side Comparator: instantly compare up to 3 countries or provinces across all criteria.
- Scenario simulator: simulate the impact of a tax increase or an energy policy shift.
- Professional exports: downloadable PDF analysis reports and Excel/CSV databases.

Independence & Integrity Charter

- No commercial influence ties: no sponsorships or exchange agreements to bias ratings.
- Algorithmic Neutrality: scores depend on auditable economic and legislative facts.
- 'Verify' button: every data point links back to its official government source (SEC, Légifrance, etc.).

Platform Access & Pricing

- Standard Plan (Free): ideal for curious users and community members (basic interactive map).
- Premium Plan (Paid): unlimited access to risk radars, AI tools, comparator, mining and exports.
- Flexible payment: secure payment by bank card or directly in crypto-assets (BTC, ETH, SOL).
